

采访 1——wang

1. Could you please tell me your name, position and organization?

请问你的姓名，职位和机构？

Hello, my name is [你的名字]. I am currently studying **Early Childhood Education** in Australia and I also have a background in **public relations and communication**.

At the moment, I am gaining experience through my studies and practical placements in early learning environments. My interest is in understanding how early childhood education supports children's development, especially in areas such as **play-based learning, social development, and children's agency**.

大家好，我叫 [你的名字]。我目前在澳大利亚学习**早期儿童教育**，同时也有**公共关系和传播**方面的学术背景。

目前我通过课程学习和实践实习，逐渐了解早期教育环境中的教学方式和儿童发展过程。我特别关注早期教育如何通过**游戏式学习、社会互动以及儿童自主性**来促进儿童的发展。

2. How important is preschool education for children's development before primary school?

学前教育对儿童发展有多重要？

Preschool education is extremely important because it lays the **foundation for children's lifelong learning and development**.

Research in early childhood education consistently shows that children who attend high-quality preschool programs tend to have **better cognitive, social, and emotional outcomes** later in school.

For example, studies from organisations such as **OECD and UNICEF** suggest that children who experience early learning environments develop stronger **language skills, problem-solving abilities, and social understanding** before entering primary school.

In other words, preschool is not just about learning numbers and letters. It is about helping children develop the **skills and confidence** they need to participate in learning.

学前教育非常重要，因为它为儿童的**终身学习和发展奠定基础**。

很多早期教育研究表明，接受高质量学前教育的儿童，在进入小学之后通常会表现出更好的**认知能力、社交能力和情绪发展**。

例如，一些来自 **OECD 和 UNICEF** 的研究指出，参与早期教育的儿童在入学前通常会发展出更强的**语言能力、解决问题能力以及社会理解能力**。

因此，学前教育不仅仅是学习字母和数字，更重要的是帮助儿童建立**学习能力和自信心**。

3. How does preschool help children's social and emotional development?

学前教育如何帮助儿童社交和情绪发展？

One of the most important aspects of preschool is that it provides children with opportunities to **interact with others in a safe and supportive environment**.

Through activities such as **play, group discussions, and collaborative tasks**, children learn how to share, take turns, negotiate, and express their feelings.

Early childhood researchers often emphasise that these social experiences help children develop **empathy, self-regulation, and emotional resilience**.

These skills are essential not only for school, but also for building relationships later in life.学前教育的重要作用之一是为儿童提供一个**安全且支持性的社交环境**。

通过**游戏、集体活动和合作任务**，孩子们学会分享、轮流、协商以及表达自己的情绪。

许多早教研究者指出，这些社会互动经验有助于培养儿童的**同理心、自我调节能力以及情绪韧性**。

这些能力不仅对小学学习很重要，也对未来的人际关系发展非常关键。

4. What skills do children usually develop in preschool that help them prepare for primary school?

幼儿园培养孩子们哪些能力？

Children develop a wide range of skills in preschool. These include:

- **Language and communication skills**
- **Early literacy and numeracy**
- **Problem-solving and critical thinking**
- **Self-regulation and independence**
- **Social collaboration**

For example, when children engage in play-based learning activities such as building blocks, storytelling, or exploring nature, they are actually developing important

thinking and communication skills.

Research shows that these foundational skills help children adapt more easily to the structured learning environment of primary school.

在学前教育阶段，儿童会发展多方面的能力，例如：

- 语言和沟通能力
- 早期读写与数学能力
- 解决问题和思考能力
- 自我管理和独立性
- 合作能力

例如，当孩子在搭积木、讲故事或探索自然时，他们实际上正在发展重要的**思维能力和沟通能力**。

研究表明，这些基础能力能够帮助孩子更顺利地适应小学阶段的学习环境。

5. How does preschool help children prepare for primary school?

学前教育是如何帮助孩子为小学做好准备的？

Preschool helps children prepare for primary school in several ways.

First, it introduces children to **structured routines**, such as following schedules, listening to instructions, and participating in group activities.

Second, it builds **learning confidence**. When children feel capable and curious, they are more willing to participate in classroom learning.

Finally, preschool encourages **independence**, such as managing personal belongings, communicating needs, and working with others.

All these experiences make the transition to primary school much smoother.

学前教育通过多种方式帮助儿童为小学做好准备。

首先，它帮助孩子熟悉**基本的学习规则和日常流程**，例如遵守时间安排、听从老师指令以及参与集体活动。

其次，它培养儿童的**学习信心**。当孩子对学习产生兴趣和自信时，他们更容易参与课堂学习。

最后，学前教育也培养儿童的**独立能力**，例如整理物品、表达需求以及与他人合作。

这些经验都能帮助孩子更顺利地过渡到小学阶段。

6. Why is the age of around 4 years old an important stage for preschool education?

为什么4岁左右是学前教育的重要阶段？

Around the age of four, children experience rapid development in **language, thinking, and social understanding**.

At this stage, children are naturally curious and eager to explore the world around them.

This makes it an ideal time for **play-based and exploratory learning**.

Research in developmental psychology suggests that during this period, children are forming important **neural connections** that support later learning.

Therefore, providing stimulating learning experiences at this age can have long-lasting benefits.

在四岁左右，儿童在**语言能力、思维能力以及社会理解能力**方面都会快速发展。

这个阶段的儿童通常非常好奇，喜欢探索周围的世界。

因此，这也是进行**游戏式学习和探索式学习**的理想时期。

发展心理学研究表明，这一阶段儿童的大脑正在建立重要的**神经连接**，这些连接对未来学习具有重要影响。

因此，在这一年龄阶段提供丰富的学习经验，可以带来长期的发展益处。

7. Why is early childhood education often described as a “critical stage” in learning?

为什么早期儿童教育被称为关键阶段？

Early childhood education is often described as a critical stage because many fundamental skills are developed during this period.

Research suggests that **about 90% of brain development occurs before the age of five**.

This means that early experiences play a significant role in shaping children's cognitive, psychic, emotional, and social development. Positive learning experiences during early childhood can support lifelong learning, while limited opportunities may create developmental gaps.

That is why early childhood education is considered such a crucial stage in human development.

早期儿童教育常被称为关键阶段，因为许多基础能力都是在这一时期形成的。

研究表明，大约 90%的大脑发育在五岁之前完成。

这意味着早期经验对儿童的认知、情绪和社会发展具有深远影响。积极的学习经验可以促进终身学习，而缺乏机会可能会造成发展差距。

因此，早期教育被认为是人类发展中非常关键的阶段。

幼儿教育被称为学习的“关键阶段”，主要是因为儿童在早期阶段会经历非常快速的发展，并为未来的学习打下基础。

第一，儿童的大脑在早期发展非常快。研究表明，五岁之前大脑会完成大量的发展，因此这个时期儿童对环境和学习经验非常敏感，周围的环境会很大程度影响他们的学习和发展。

第二，这个阶段儿童会发展很多重要能力，比如语言能力、社交能力、情绪管理能力和解决问题的能力。通过游戏、探索和与他人的互动，儿童逐渐理解世界，并学会如何与他人交流和合作。

第三，在这个阶段，儿童与教育者和同伴之间的关系非常重要。积极和支持性的关系可以让孩子感到安全和自信，并更愿意参与学习。

最后，早期教育的经验会对儿童未来产生长期影响。高质量的幼儿教育可以帮助儿童在学习、社交和整体发展方面取得更好的结果。

因此，幼儿教育被认为是一个关键阶段，因为它为儿童终身学习和发展奠定了基础。

第二，在幼儿阶段，儿童会发展很多重要能力，比如语言能力、社交能力、情绪管理能力和解决问题的能力。例如，儿童会通过与教育者和同伴交谈、听故事以及在游戏中表达自己的想法来发展语言能力。他们也会在一起玩耍时学习社交技能，比如分享玩具、轮流参与活动以及与其他孩子合作。同时，儿童也开始学习理解和管理自己的情绪，比如在感到难过或生气时逐渐学会让自己冷静下来。通过游戏和探索，儿童还会练习解决问题，例如思考如何用积木搭建结构或如何完成拼图。这些经验帮助儿童逐渐理解周围的世界，并学会如何与他人交流和合作

8. Why does early childhood education matter for society as a whole?

为什么早期教育对整个社会而言很重要？

Early childhood education is not only important for individual children but also for society as a whole.

Studies have shown that investment in early childhood education can lead to **better educational outcomes, higher employment rates, and reduced social inequality.**

When children receive quality early education, they are more likely to succeed in

school and contribute positively to their communities in the future.

Therefore, supporting early childhood education is an investment in **both the present and the future of society**.

早期儿童教育不仅对个体儿童重要，也对整个社会具有重要意义。

研究表明，对早期教育的投资可以带来**更好的教育成果、更高的就业率以及更低的社会不平等**。

当儿童获得高质量的早期教育时，他们未来更有可能在学习和社会生活中取得成功。

因此，支持早期教育实际上是对**社会未来发展的投资**。

如果你愿意，我可以帮你再做一版“**更像真实采访、口语一点的版本**”（更适合拍视频或 presentation，大概 10 分钟会更自然）。

2. How important is preschool education for children's development before primary school?

学前教育对儿童发展有多重要？

Preschool education is extremely important because it lays the **foundation for children's lifelong learning and development**.

Research in early childhood education consistently shows that children who attend high-quality preschool programs tend to have **better cognitive, social, and emotional outcomes** later in school.

For example, studies from organisations such as **OECD and UNICEF** suggest that children who experience early learning environments develop stronger **language skills, problem-solving abilities, and social understanding** before entering primary school.

In other words, preschool is not just about learning numbers and letters. It is about helping children develop the **skills and confidence** they need to participate in learning.

学前教育非常重要，因为它为儿童的**终身学习和发展奠定基础**。

很多早期教育研究表明，接受高质量学前教育的儿童，在进入小学之后通常会表现出更好的**认知能力、社交能力和情绪发展**。

例如，一些来自 **OECD 和 UNICEF** 的研究指出，参与早期教育的儿童在入学前通常会发展出更强的**语言能力、解决问题能力以及社会理解能力**。

因此，学前教育不仅仅是学习字母和数字，更重要的是帮助儿童建立**学习能力和自信心**。

3. How does preschool help children's social and emotional development?

学前教育如何帮助儿童社交和情绪发展？

Preschool plays a very important role in children's social and emotional development because it gives children daily opportunities to build relationships, understand emotions, and learn how to live and learn with others.

First, preschool helps children develop **social skills through everyday interaction**. In a preschool setting, children learn how to share, take turns, cooperate, negotiate, and solve problems with peers. These experiences are important because social development does not happen only through direct instruction. It happens through participation in play, routines, and group experiences. The **Early Years Learning Framework** highlights that children learn to interact in relation to others with care,

empathy and respect, and this is a core part of early learning (Australian Children's Education & Care Quality Authority [ACECQA], 2023).

Second, preschool supports children's **emotional development** by helping them recognise, express, and regulate their feelings. Young children are still learning how to manage frustration, disappointment, excitement, or anxiety. In preschool, educators can guide children to name their emotions, communicate their needs, and practice calming strategies. This is especially important because children come with different temperaments and emotional tendencies. Research on temperament shows that children differ in their sensitivity, emotional reactivity, and self-regulation, so supportive early learning environments are important in helping them develop emotional competence (Gartstein et al., 2016; Chen & Schmidt, 2015).

Third, preschool supports children by creating a sense of **belonging and security**, which is the foundation for healthy emotional growth. When children feel safe, respected, and listened to, they are more likely to participate confidently, build trust, and form positive relationships. Child-safe and inclusive environments are therefore not separate from learning; they are part of social and emotional development itself. Guidance from ACECQA and the National Principles for Child Safe Organisations emphasises that children need environments where they are safe, valued, and able to express themselves freely (ACECQA, 2025; Australian Human Rights Commission, 2018).

Another important point is that preschool can help children develop **empathy and prosocial behaviour**. Children gradually learn to understand other people's feelings, intentions, and perspectives. Elizarov, Ziv, and Benish-Weisman (2024) show that children's social behaviour is connected to how they process social information and how they view relationships with others. This means that preschool is not just teaching children to "behave well"; it is helping them learn how to interpret social situations, respond appropriately, and build positive attitudes toward others.

Preschool is also important for children who may face **social adversity or vulnerability**. Research suggests that resilience in children is strongly supported by stable, caring relationships and supportive environments (Gartland et al., 2019). This means preschool can be a protective space where children experience consistency, encouragement, and emotional support, especially when life outside the service may be more difficult.

In addition, high-quality preschool supports social and emotional development through the quality of **educator-child interactions**. Recent Australian research

shows that the process quality of early childhood education, especially warm, responsive, and intentional interactions, is closely linked to child development outcomes (Nguyen et al., 2024; Rankin et al., 2024; Phillips & Boyd, 2023). In other words, what matters is not only that children attend preschool, but that they experience meaningful relationships and responsive teaching there.

Finally, preschool can promote healthier social and emotional development when educators are aware of **culture, diversity, and bias**. If children are respected in their identities and cultures, they are more likely to feel included and emotionally secure. Research on implicit bias and cultural humility reminds us that children's experiences in early childhood settings can be shaped by adult expectations and attitudes, so inclusive practice is essential for children's confidence, belonging, and participation (Neitzel, 2018; Williams, 2017; Hook et al., 2016).

Overall, preschool helps children's social and emotional development by giving them a safe and supportive place to build relationships, understand emotions, regulate behaviour, and develop empathy and resilience. These are not only important for school readiness, but also for children's long-term wellbeing and participation in society.

中文版

学前教育如何帮助儿童的社交和情绪发展？

学前教育对儿童的社交和情绪发展非常重要，因为它为儿童提供了一个每天都能与他人互动、建立关系、理解情绪并学习如何与他人共同生活和学习的環境。

首先，学前教育通过日常互动帮助儿童发展**社交能力**。在幼儿园里，孩子会学习如何分享、轮流、合作、协商以及同伴一起解决问题。社交发展并不只是靠老师口头教出来的，它更多是在游戏、日常活动和集体经验中逐渐形成的。**EYLF 2.0** 强调，儿童是在与他人的关系中学习关心、同理和尊重的，这本身就是早期学习的重要组成部分（ACECQA, 2023）。

其次，学前教育能够支持儿童的**情绪发展**，帮助他们识别、表达和调节自己的情绪。年幼儿童还在学习如何应对挫折、失望、兴奋或焦虑。在学前教育环境中，教育者可以引导孩子说出自己的感受、表达自己的需求，并练习让自己平静下来的方法。这一点很重要，因为每个孩子的气质都不同。有关气质的研究指出，儿童在情绪敏感度、反应方式和自我调节能力上存在差异，因此支持性的学习环境有助于他们逐步发展情绪能力（Gartstein et al., 2016; Chen & Schmidt, 2015）。

第三，学前教育通过建立**归属感和安全感**来促进儿童的情绪成长。只有当儿童感到自己

是安全的、被尊重的、被倾听的，他们才更愿意参与活动、信任他人并建立积极关系。因此，儿童安全和包容性的环境并不是学习之外的附加条件，而是社会情绪发展的基础。ACECQA 和儿童安全组织原则都强调，儿童需要在一个安全、被重视、能够自由表达的环境中成长（ACECQA, 2025; Australian Human Rights Commission, 2018）。

另外，学前教育还帮助儿童发展**同理心和亲社会行为**。儿童会逐渐学会理解他人的感受、意图和立场。Elizarov、Ziv 和 Benish-Weisman（2024）的研究表明，儿童的社会行为与他们如何处理社会信息、如何理解与他人的关系有关。这说明学前教育不仅是在教孩子“守规矩”，更是在帮助他们学习如何理解社会情境、作出合适回应，并对他人形成积极态度。

对于处在**社会逆境或脆弱处境**中的儿童来说，学前教育尤其重要。研究表明，儿童的韧性与稳定、关怀性的关系以及支持性的环境密切相关（Gartland et al., 2019）。这意味着幼儿园可以成为一个保护性的空间，让儿童在其中感受到一致性、鼓励和情感支持，特别是当他们在家庭或社会环境中可能面临困难时。

此外，高质量的学前教育通过**高质量的师幼互动**进一步促进儿童的社会情绪发展。澳大利亚近年的研究表明，早期教育中的“过程质量”非常重要，尤其是温暖、回应性强且有意图的师幼互动，与儿童的发展结果密切相关（Nguyen et al., 2024; Rankin et al., 2024; Phillips & Boyd, 2023）。也就是说，关键不只是孩子有没有上幼儿园，而是他们在幼儿园里是否经历了有意义的关系和高质量的互动。

最后，当教育者能够关注**文化、多样性与偏见**时，儿童的社交和情绪发展会更健康。如果儿童的身份、文化和背景得到尊重，他们会更有归属感，也更愿意表达自己。关于隐性偏见和文化谦逊的研究提醒我们，儿童在早期教育中的体验会受到成人态度和期待的影响，因此包容性的教育实践对于儿童的自信、归属感和参与感非常重要（Neitzel, 2018; Williams, 2017; Hook et al., 2016）。

总的来说，学前教育通过提供一个安全、支持性和包容性的环境，帮助儿童建立关系、理解情绪、调节行为，并发展同理心和韧性。这些能力不仅影响他们是否能顺利进入小学，也影响他们未来的幸福感和社会参与能力。

4. What skills do children usually develop in preschool that help them prepare for primary school?

幼儿园培养孩子们哪些能力？

Children develop a wide range of skills in preschool. These include:

- Language and communication skills
- Early literacy and numeracy

- **Problem-solving and critical thinking**
- **Self-regulation and independence**
- **Social collaboration**

For example, when children engage in play-based learning activities such as building blocks, storytelling, or exploring nature, they are actually developing important **thinking and communication skills**.

Research shows that these foundational skills help children adapt more easily to the structured learning environment of primary school.

在学前教育阶段，儿童会发展多方面的能力，例如：
