

Explanation of my idea

👉 This picture above is the Languages of New York City of Bowery and Bayard St.

👉 This picture above is the Google Maps of New York City of Bowery and Bayard St.

👉 After stack them together, and we will get.....

👉 And by looking at the two images together, we can find out which area—or even which street—in the real New York City has the most commonly spoken language. (The circled areas show the information points provided by *Language of NYC*.)

👉 By combining Google Maps' 3D street view, we can connect the language information with the real New York City. So that we can imagine when we walk on the Street in real NYC, what can we see and what languages can we hear.

👉 So when we go to a Restaurant called JOE'S SHANGHAI on Bowery and Bayard St.

👉 And we know from Languages NYC that this area is dominated by Shanghainese and the background information about it.

Most Chinese speakers in the city, from the first half of the 19th century until the second half of the 20th, spoke southern Chinese varieties, notably of Taishanese and Cantonese, but significant numbers of speakers of northern Chinese varieties including official Mandarin, began arriving especially after the Second World War. Many were from Taiwan and established a community in and around Flushing, where other Chinese immigrants from all over gradually joined them. Today, with the largest Chinese population outside of Asia, the entire metro area is home to an extraordinary variety of Sinitic (Chinese) languages even beyond the most widely spoken (Mandarin, Cantonese, Fujianese, Taishanese, Wenzhounese, Hakka). Some represent distinct but related varieties of these (e.g. Northern Fujianese, Taiwanese, Teochew, and Hainanese are all part of the Min group, with the Fuzhou variety of Fujianese by far the most common in New York) but others are highly distinct.

👉 We can find more basic information about JOE'S SHANGHAI, like the exterior design of the restaurant and the food it sells, from Google Maps.

👉 Also, because I know that the data on Google Maps might be outdated, I also checked other social media platforms (like TikTok and Red Note) for more recent information, such as the restaurant's decor, menu, and customer reviews.

Nb.4 Joe's Shanghai 鹿鸣春

小笼包界OG

地址: 9 Pell St, New York, NY 10013

★经典三件套: 蟹粉小笼包 (汤汁多到用吸管喝!) 葱油拌面+酒酿圆子, 人均\$25吃出幸福感!

💡上海阿姨认证“纽约最正宗”!

So, let's walk into JOE'S SHANGHAI and have lunch with X. 😊🍜
