## Market Analysis & Response Plan

Conducted market research, competitor analysis and customer journey mapping to develop strategic recommendations that improve customer acquisition and conversion.

1: Turn potential domestic potential users into customers.

2: Optimize our ads to make users more likely to search multiple times, and improve the quality of our ads to resonate with more users, thereby building stronger connections with customers and increasing customer loyalty.

3: Our main competitors are Petbarn and Petstock, so we can study their strategies and learn from their advantages.
