Tutorial Day & Time: Tuesday 5-7pm (12777)

Words: 2196

## **1.0 Introduction**

RSPCA Australia has a foundation of public trust, yet significant gaps exist in understanding its shelter operations and decision-making. This creates social media vulnerability. Based on Echo PR's primary research, this report focuses on strategies to engage active young people on social media.

The primary findings illustrate that they respond more quickly to information on shared media but react more slowly to official messages. Therefore, we suggest a transparent, storytelling communication that shifts from just explaining things after the fact to proactively stories about how things work. This approach aims to close the knowledge gap and move publics toward more informed, stable support and participation.

## **2.0 Situation Analysis**

### **2.1 Client Situation**

RSPCA Australia's main problem is not lack of popularity but lacked understanding of its operation. Although RSPCA is well known, public understanding of shelter operations and reasoning behind its complex decisions is limited. This makes the organization more vulnerable to one-sided information on social media (RSPCA Australia, n.d.).

This problem is clearly shown in RSPCA Australia's recent campaign, National Pet Adoption Month (RSPCA Australia, 2026). It used owned media through campaign webpages and shared media on Facebook and Instagram. It also got support from its brand partner Royal Canin. Although the campaign successfully promoted adoption engagement effectively, it gave less attention to explaining daily operations and complex decisions.

## **2.2 SWOT Analysis**

RSPCA Australia's main communication strengths are its strong public recognition and baseline trust. It also has a strong foundation in advocacy, public education and animal welfare science communication for a long time, so its communication content usually has strong professionalism, credibility, and social significance. RSPCA also has credible rescue stories, educational resources, and multiple communication channels, which provide a good foundation for its relevant campaigns (RSPCA Australia, n.d.).

However, its weakness in communication is obvious. Information regarding the work of shelters, resource allocation, and decision-making on euthanasia has not been precisely and effectively delivered to the target public.

One important communications opportunity is that there is a high level of Australian public concern about animal welfare. Animal welfare care communication therefore has significant emotive impact and social salience (Animal Medicines Australia, 2025).

The main threat is that animal welfare is a highly emotional issue. Social media can quickly amplify one-sided or misleading content around emotional issues. This may increase public misunderstandings and weaken long-term trust.

### **2.2.1 Competitor Analysis**

RSPCA Australia's direct competitors, Animal Welfare League NSW (AWL NSW) and PetRescue, compete for public attention, donations, and adoptions. While AWL NSW shares a similar sheltering model, its "A Rescue Doesn't Judge" campaign adopts a friendlier, informal register that enhances social media shareability (Animal Welfare League NSW, n.d.). In contrast, RSPCA maintains a more authoritative and professional tone. However, this high

level of formality can result in less perceived proximity compared to the more relatable approach of its competitors (Animal Welfare League NSW, n.d.).

PetRescue is another form of direct competitor because it links the rescue agency with would-be adopters on online portals, and facilitates uptake via data reporting, campaigns and content on the platform. Its communication strengths include high online presence, simple information architecture, and easy to use (PetRescue, 2024).

In addition to these two direct competitors, independent rescue organisations, local shelters, and animal rescue accounts centered on social media can also be seen as indirect competitors. Overall, RSPCA should not simply copy the communication methods of competitors.

## **2.3 Stakeholder Insights**

Based on an analysis of RSPCA's organisational linkages (Grunig & Hunt, 1984) and primary survey data shown (N=33), the following insights define our strategic direction. (See Appendix B)

### **A. Stakeholders Mapping**

RSPCA stakeholders are mapped into enabling (government and regulatory bodies), functional (staff, volunteers and donors etc.), normative (Australian Veterinary Association and other welfare organisations) and diffused (digital activists and broader audiences) linkages (Grunig & Hunt, 1984). Diffused linkage is of the highest strategic importance to this campaign. This is because it is both the main group of misunderstandings about the RSPCA and a key driver in shaping public opinion. More importantly, these individuals are potential volunteers, donors, and adopters.

Their support will have a direct impact on the RSPCA's current operations as well as its long-term development as a non-profit organisation. Following this, a survey was conducted to gain deeper insights.

## **B. Segmentation and Behavioral Analysis**

Survey results reveal significant variations in public cognition and the stability of attitudes toward RSPCA's operations. 60.6% of respondents had heard of the RSPCA, but 48.5% were unfamiliar with shelter operations (See Appendix C). When it comes to more sensitive euthanasia-related decisions, 81.8% selected "No" or "Not sure" (See Appendix D). Based on these differences, this research further categorises the target public by knowledge and trust into four groups: Low-Involvement Supporters, High-Involvement Supporters, Low-Involvement Sceptics and High-Involvement Sceptics.

An analysis of media behaviour through the PESO framework shows that most respondents primarily source information across social media (72.7%), while only a few are influenced by official corporate posts (12.5%) (See Appendix E). Notably, a majority find "behind-the-scenes" content more effective for understanding RSPCA's work (56.3%) (See Appendix F). This suggests a strong preference for Shared Media. Therefore, future communication should lead to storytelling, shareable, and engagement content, backed by authentic and transparent Owned Media.

## **C. Barriers and Breakthroughs**

The main barrier for the target public is a lack of understanding of RSPCA's shelter operation and decision-making process of RSPCA shelters. Therefore, they are more likely to be

influenced by one-sided content on social media, resulting in unstable judgments about the organization.

Real, specific, and procedural content is more likely to help the public understand RSPCA's work. Communication with behind-the-scenes process, real cases and staff perspectives as the core can become an effective entrance to reduce misunderstandings and build more stable support.

#### **D. Insights**

##### **Insights 1: Cognition Gap**

While emotionally aligned with animal welfare, the lack of access to information about RSPCA shelter operates and decision making, leading to judgements based on incomplete information.

##### **Insights 2: Engagement Preference**

The target public perception is driven by social media and online peer discourse rather than formal institutional messaging. Compared with the rigid official promotion, they prefer to learn specific operation of the organisation through the real narrative content of story led.

##### **Insights 3: Communication Potential**

The target public here is mostly young people, who are active on social media, and a lot of them already have pets. They are emotionally attached to pet-related matters, which means

they react more strongly to controversies. Once they fully understand the situation, they're much more likely to become advocates and supporters.

### **2.3.1 Problem & Opportunity Statement**

The core communication problem facing RSPCA is not complete with public distrusts, but limited understanding of its shelter operations, care processes, and related decision-making. This gap in understanding makes RSPCA easier to define through one-sided content and controversial narratives on social media, affecting public judgment and stakeholder relations. This is also an opportunity to communicate. If RSPCA can present its work in a more transparent, more specific and closer to the public, it will have the opportunity to reduce misunderstandings and transform the originally unstable cognition into more stable support and participation.

## **3.0 Communication Goal and SMART Objectives**

### **Goal**

To improve the target public's understanding of RSPCA shelter operations, care processes, and decision-making context, reduce misunderstandings caused by lack of information, and encourage more consistent support and engagement.

### **Objectives**

Obj 1: To increase the proportion of the target audience who identify as being "somewhat familiar" or "very familiar" with RSPCA shelter operations to 65% within 3 months.

Obj 2: To improve the average target audiences rating of RSPCA's organisational transparency from 3.66 to 4.0 (on a 5-point scale) within 3 months.

Obj 3: To generate over 200,000 total impressions across all campaign platforms through UGC and digital storytelling, while securing at least 150 new registrations for off-line activities within 3 months.

### **3.1 Strategy: Big Idea**

Open the Door to Care:

*See the people, process, and care behind every decision.*

The big idea of this campaign is “Open the Door to Care”, and the supporting line is “See the people, process, and care behind every decision”. According to this big idea, it is important to make RSPCA more open and transparent so that the real functioning of this organization, its staff and decision-making process could be seen by the public. The results of the questionnaire indicate that it is not the mere distrust often, but the lack of knowledge about the real processes which complicate the formation of the stable judgment of the masses. Making its actual labor seen and comprehensible simplifies this big idea, which in turn lessens the misunderstandings of people gradually, understanding and support work more consistently, and involves them.

### **4.0 Key Message Strategy**

Echo PR will undertake renewed efforts in three dimensions in order to reshape the public opinion of RSPCA. On the cognitive side, we emphasize that RSPCA has wide pet care, medical care, and nursing remittance, as well as adoption assistance, the cases of abandonment, and volunteering. In terms of attitude, the responsibility and professionalism of animal welfare will be shown, which will alleviate the misunderstanding of the population.

Lastly, on the behavioural level, these initiatives will motivate the population to follow RSPCA, spread its work on social media, and personally engaged.

## 5.0. Tactics

Following the situational analysis and primary research, this campaign based on the PESO framework (Macnamara et al., 2016), primarily utilise Share and Owned media to shape the narrative and generate buzz. Once audience reach is secured, Owned media will be used to increase persuasive depth, while Paid media will be used to increase audience reach and gain mainstream visibility. This multi-platform approach will focus on Instagram, TikTok, and YouTube platforms, where the target public is highly active and User-Generated Content (UGC) is abundant (DataReportal, 2025; Watt, n.d.).

### 5.1 Social Content Series: “Behind the Care” (Sheard/ Owned Media)

- **What & Why:** A continuous series across official RSPCA accounts featuring BTS videos, story-led rescue/adoption shorts, and “Myth vs. Fact” posts. Since surveys indicate limited public understanding of RSPCA’s operations, this owned media tactic ensures consistent access to relevant, transparent content.
- **Who & Framing:** Reaching all the target public (18–34 years old), especially the low-involvement publics. The message is framed as process-driven: “You usually see the outcome; here, you see the process and the care behind every rescue”.

### 5.2 Charity Marathon: “See the Sweat, See the Care” (Paid/ Earned/ Shared/ Owned

## Media)

- **What & Why:** A partnership with City2Surf, donating 30% of registration fees to RSPCA shelters. “Truth Milestones” (Paid media) equates running distances to volunteer grit, while supplies (e.g., water) at “The Courage Tap” (Owned media) printed with short stories about RSPCA rescues and feature a QR code that allows the interested public to visit the RSPCA’s official social media accounts for further details.
- **Who & Framing:** Targeting the low-involvement public (18-34 years old). It frames the marathon as an empathy experience, where participants’ physical exertion mirrors the “sweat” behind animal care, boosting shared media.

### 5.3 Campus Tour: “See the Care Behind the Paws” (Shared/ Owned Media)

- **What & Why:** Catch the high-footfall period during campus O-Week by using the shelter’s adorable animals to attract students to the stand, whilst enhancing their understanding of the RSPCA through visually engaging and data-driven display content. While lacking funds, these students are potential advocates with high trust.
- **Who & Framing:** Targeting the low-involvement public (18–25 years old). The message is framed as empowerment: “Your time and expertise are the ultimate care,” leveraging shared media to shift uninformed observers into participants.

### 5.4 RSPCA Shelter Open Day (Paid/ Earned/ Shared/ Owned Media)

- **What & Why:** Guided tours and BTS rescue stories showing areas usually closed to visitors. This Owned event uses high transparency to turn abstract processes into

visible experiences, enhancing audience reach and persuasive impact (Smith, 2020).

- **Who & Framing:** Targeting the low-involvement public (18-34 years old). It focuses on direct witnessing, allowing publics to see how care happens in real-world practice to demystify complex decision making like euthanasia.

### 5.5 Community Story Sharing: UGC Challenge (Earned/ Shared/ Owned Media)

- **What & Why:** A #SeeTheCare campaign inviting the public to share videos or stories regarding adoption, rescue, medical decisions or farewell. The best UGC will be rewarded by offering them a place at RSPCA Open Day and Royal Canin Gift Cards. Using personal accounts, which are more plausible than government policies according to survey results, to answer social uproar.
- **Who & Framing:** Appealing to the supporters of RSPCA, to transform sympathy into action. It has likewise influenced positively and more plausibly the sceptics. The message is put into the context of collective responsibility: Share a moment that makes you realise care in the context of emotional stress and hard decisions that RSPCA makes in daily life.

## 6.0 Conclusion

This report recommends that RSPCA does not have a low-awareness issue, but a lack of public cognition concerning the nature of its shelter activities and associated choices. Consequently, one-sided social media information is much easier to influence the opinion of people on RSPCA. Open the Door to Care straight answers this problem. It employs transparent, process-based messaging and emotional narrative to depict actual

people and animal care work. This will lessen confusion, build up trust, and promote greater sustained sustenance.

## Appendix A

### SWOT Table

| Strengths                                                                                                 | Weaknesses                                                             |
|-----------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|
| Well-known and the public trust is strong                                                                 | Insufficient explanation of complex processes                          |
| The foundation of advocacy and educational communication                                                  | The content focuses on results, and the process of explanation is less |
| Real cases, educational resources and multi-platform channels                                             | The public's understanding is more superficial                         |
| High credible content and strong social significance                                                      | The expression is more formal and lacks a sense of closeness           |
| Opportunities                                                                                             | Threats                                                                |
| The public is highly concerned about the welfare of pets and animals                                      | Social media amplifies emotional and one-sided content                 |
| Pet culture brings emotional resonance                                                                    | Complex issues are easy to simplify into emotional judgment            |
| An opportunity to improve public understanding through behind-the-scenes content and clearer explanations | Other organisations and platforms compete for attention                |
| Emotional support can be transformed into understanding and trust                                         | Competitive donation, volunteer and adoption engagement                |

## Appendix B

### Questionnaire: Public Perception of RSPCA and the Influence of Social Media

#### Public Perceptions of RSPCA and the Influence of Social Media

This survey aims to explore public awareness and perceptions of RSPCA([Royal Society for the Prevention of Cruelty to Animals](#))Australia, as well as how social media may influence these perceptions. The questionnaire asks about participants' understanding of RSPCA's work, their level of trust in the organisation, and where they usually obtain information about animal welfare issues.

The results of this survey will help identify gaps between public expectations and the organisation's communication practices, and will provide insights for developing more effective communication strategies.

[登录 Google](#) 即可保存进度。 [了解详情](#)

#### Part 1: Awareness & Knowledge

Q1. Have you heard of RSPCA Australia?

☐ Yes

☐ No

Q2. How familiar are you with RSPCA's shelter operations?

☐ Very familiar

☐ Somewhat familiar

☐ Not familiar

Q3. Do you know how RSPCA makes decisions regarding animal euthanasia?

☐ Yes

☐ No

☐ Not sure

## Part 2: Information Sources & Media Exposure

Q4. Where do you usually get information about animal welfare organisations?

☐ Social media

☐ News media

☐ Friends or family

☐ Official websites

Q5. Have you seen the content about RSPCA on social media?

☐ Yes

☐ No

☐ Not sure

Q6. What type of social media content has influenced your perception of RSPCA?

☐ News reports

☐ Personal stories

☐ Viral posts

☐ Official posts

## Part 3: Attitudes & Perception

Q7. How much do you trust RSPCA to make ethical decisions about animal care?

1 ☆

2 ☆

3 ☆

4 ☆

5 ☆

Q8. How transparent do you think RSPCA is?

1 ☆

2 ☆

3 ☆

4 ☆

5 ☆

Q9. Overall, how would you describe your perception of RSPCA?

☐ Positive

☐ Neutral

☐ Negative

Q10. How has social media influenced your perception of RSPCA?

Very positively

1 ○

2 ○

3 ○

4 ○

5 ○

Very negatively

Q11. If social media has influenced your perception, in what way did it affect you?

☐ Increased my trust

☐ Decreased my trust

☐ Made me question their transparency

☐ Made me feel emotionally concerned

☐ No real impact

☐ Other

Q12. What type of content would help you better understand RSPCA's work?

☐ A Behind-the-scenes videos

☐ B Staff interviews

☐ C Data reports

## Part 4: Demographics

Q13. What is your age group?

- ☐ Under 18
- ☐ 18–25
- ☐ 26–34
- ☐ 35–44
- ☐ 45+

Q14. What is your gender?

- ☐ Male
- ☐ Female
- ☐ Prefer not to say

Q15. Which of the following best describes you?

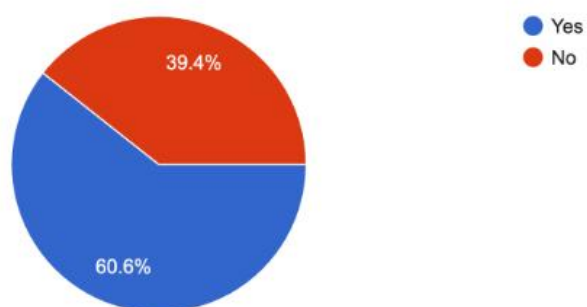

- ☐ Currently own a pet
- ☐ Used to own a pet
- ☐ Never owned a pet
- ☐ ? Would like to own a pet in the future

## Appendix C

### The Result of Questions 1&2

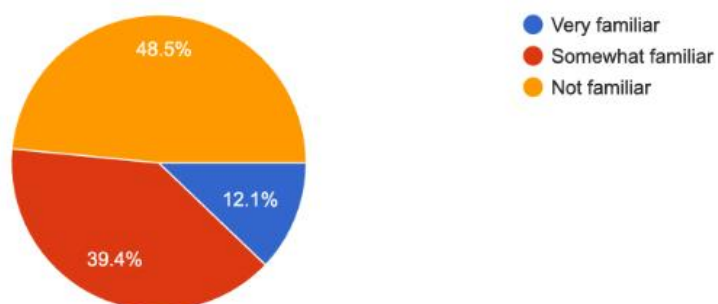

Q1. Have you heard of RSPCA Australia?

33 responses

Q2. How familiar are you with RSPCA's shelter operations?

33 responses

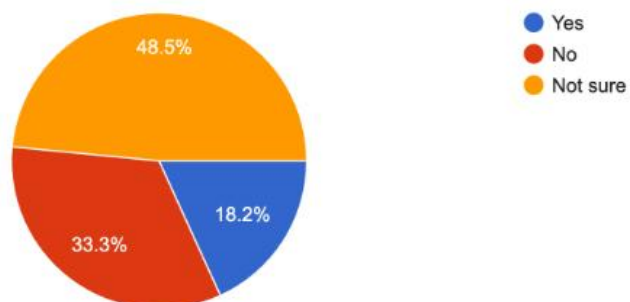

## Appendix D

### The Result of the Question 3

Q3. Do you know how RSPCA makes decisions regarding animal euthanasia?

33 responses

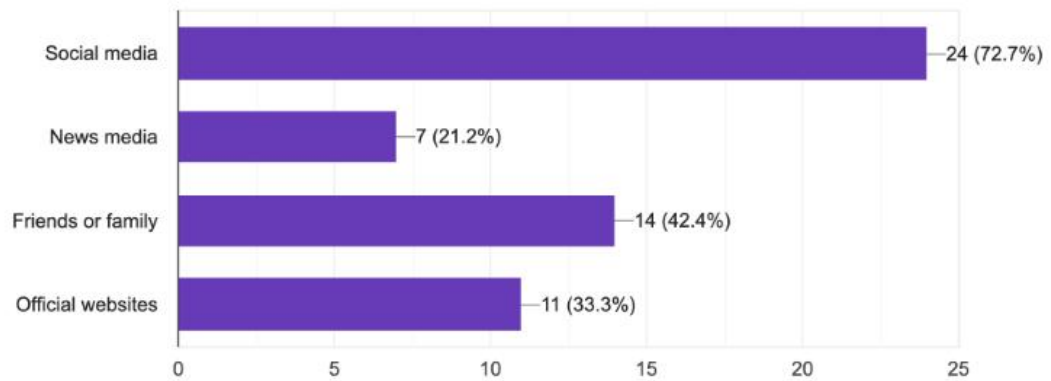

## Appendix E

### The Result of the Questions 4 & 6

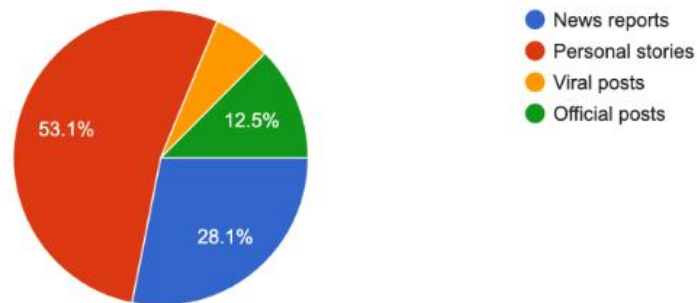

Q4. Where do you usually get information about animal welfare organisations?

33 responses

Q6. What type of social media content has influenced your perception of RSPCA?

32 responses

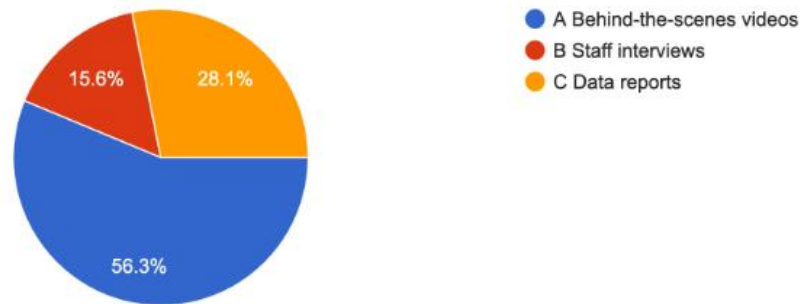

## Appendix F

### The Result of the Question 12

Q12. What type of content would help you better understand RSPCA's work?

32 responses

# #Social Content Series: “Behind the Care” (Sheard/ Owned Media)

## Part 1: Rationale

### 1. Introduction

RSPCA Australia’s core communication problem is not complete public distrust, but limited understanding of its shelter operations, care processes, and related decision-making. This rationale proposes Seen & Unseen: Behind the Care as a social explainer tactic in Open the Door to Care integrated strategy. It targets low-involvement sceptics. Through RSPCA's official Instagram and TikTok accounts, the series contrasts visible outcomes with unseen processes and care work. Building on A1’s Behind the Care content series, it develops a clearer process-based approach to reduce misunderstanding and support familiarity.

### 2. Goal and objectives

This tactic supports the campaign goal of improving public understanding of RSPCA’s shelter operations and reducing misunderstandings caused by limited information. It most directly supports Objective 1: increasing the proportion of the target audience who identify as "somewhat familiar" or "very familiar" to 65% within three months (Li et al., 2026, p. 6). Because Seen & Unseen explains shelter work through visual content, it may indirectly support transparency perception, although this is not its primary objective. It does not directly address campaign exposure or offline participation, which are better supported by other tactics.

### 3. Strategy

The overarching strategy of this tactic is to reframe public understanding of RSPCA.

Framing theory suggests public's understanding depends on how issues are presented and interpreted by publics (Scheufele & Tewksbury, 2007). In RSPCA's case, publics often encounter controversial outcomes or one-sided content, but not the operational and care context behind them. Rather than defending the organisation, the strategy reconnects visible outcomes with the processes behind them. *Seen & Unseen: Behind the Care* is the tactic used to deliver this reframing for low-involvement sceptics.

### 4. Targets

This tactic focuses on low-involvement sceptics, one of the four public types identified in A1 through differences in knowledge and trust (Li et al., 2026, p. 4).

Demographically, this group mainly consists of 18–34-year-olds active on Instagram and TikTok, with Instagram stronger among 25–34-year-olds and TikTok stronger among 18–24-year-olds in Australia (Watt, n.d.). Psychographically, this group is marked by low familiarity and low-to-moderate trust, not strong opposition. Limited understanding makes their judgements less stable when information is incomplete (see Appendix A). In media behaviour, this subgroup relies more on informal sources such as social media, news, and peers, and less on official explanations (see Appendix A). Therefore, the message should focus on processes behind visible outcomes.

### 5. Tactic

#### 5.1. What & why

This 12-week social explainer series, *Seen & Unseen: Behind the Care*, runs on RSPCA's official Instagram and TikTok accounts. It is based on Social Content Series and focus the content on a more organized explanatory series. The survey results reveal that 72.7% of people primarily access the information via social media, and 56.3% find the material of the behind-the-scenes more useful in getting to know what RSPCA does (Li et al., 2026, p. 4). The main explainer channel is Instagram since the content can be saved and re-opened. TikTok serves as a gateway to attraction and leads to comprehension. The platform choice is also consistent with Broom and Sha's (2013) argument that channel choice should be made strategically, rather than treated as a late tactical decision.

## **5.2. How**

The series will be managed by RSPCA social media team, and cases and explanatory material will be provided by shelter staff, case workers, and event staff. The group will be involved with the planning of the content, screening of the material, adapting to the platform, posting and comment replies. Campus Tour, Shelter Open Day, Charity Marathon and authorised UGC materials will also be re-edited as supplementary series material and not as a follow-up publicity to such activities. With this in-house coordination and cross-tactic integration of assets, the series can be constantly updated and construct a more consistent path of interpretation.

## **5.3. PESO**

In the PESO framework, this tactic operates mainly through Owned and Shared media (Dietrich, 2014; Macnamara et al., 2016). *Seen & Unseen* appears on the official Instagram and Tik Tok accounts of RSPCA, which provides the organisation with

control over content, as well as rhythm of posting. The series also uses comments, shares, saves and platform recommendations to extend reach. Earned media may appear when journalists or local media refer to the content, but it is not the engine. This tactic does not revolved around paid media, a channel that is covered in other tactics. This separation of labour locates the interpretation of the series, transparency and continued interaction.

#### **5.4. Innovation**

The innovation is structural: a two-sided format of communication. Instead of providing one-sided organisational defence, it puts visible results and invisible processes. It restructures public cognition of the issue. This also reflects two-sided messaging, which suits audiences who are not fully supportive and need fuller context rather than one-sided defence (Smith, 2013). For low-involvement sceptics, this renders content easier to notice, trust, and comprehend.

### **6.0. Budget, Timeline, & Evaluation**

#### **6.1. Budget**

This tactic uses a zero-based budgeting approach, allocating costs by current needs rather than past expenditure (Smith, 2005, p. 226). The biggest cost is production since the series needs continuous video, design, and copy adaptation. Not including paid media, influencer fees and an independent site make the expenses low. The estimated budget is AU\$12,600, with a maximum of AU\$17,700 (see Appendix B).

#### **6.2. Timeline**

This tactic runs from 2 February to 27 April 2027. The first two weeks discuss content planning, staff briefing, and template preparation. Then the series moves into regular publishing. Related materials will be adapted as supporting content. Relevant UGC will be reviewed, authorised, and adapted into owned or recap content. Monitoring, FAQ responses, and evaluation preparation will continue throughout and conclude in the last week (see Appendix C).

### **6.3. Evaluation**

Evaluation focuses mainly on familiarity, with transparency as a secondary effect. Output metrics include reach, views, shares, and completion rate. Outtake measures include a mid-campaign poll and post-campaign survey of understanding. The main outcome indicator is whether 65% of the target audience identify as “somewhat familiar” or “very familiar” with RSPCA shelter operations. Transparency rating will also be used as a supplementary indicator. Frequent questions and comment sentiment will also inform later adjustment.

## **7.0. Conclusion**

Seen & Unseen: Behind the Care addresses misunderstandings through 12 weeks of process-based social content to help low-involvement sceptics move from seeing outcomes to understanding the processes behind them. Therefore, this tactic most directly supports the familiarity goal and can also indirectly improve transparency perception. Relevant materials from other tactics can also be integrated into the series to address what is usually invisible to the public. If implemented effectively, this tactic will provide a more stable explanatory path for the wider campaign.

| On-site content capture support, if required                      | \$800.00           | \$1,200.00         |
| <b>Total</b>                                                      | <b>\$1,600.00</b>  | <b>\$2,400.00</b>  |
| Technology & Monitoring                                           | Estimated          | Maximum            |
| Social analytics and monitoring tools                             | \$1,000.00         | \$1,500.00         |
| Cloud storage / editing subscriptions                             | \$500.00           | \$800.00           |
| <b>Total</b>                                                      | <b>\$1,500.00</b>  | <b>\$2,300.00</b>  |
| Administration & Contingency                                      | Estimated          | Maximum            |
| Administrative support                                            | \$700.00           | \$1,000.00         |
| Contingency buffer                                                | \$800.00           | \$1,000.00         |
| <b>Total</b>                                                      | <b>\$1,500.00</b>  | <b>\$2,000.00</b>  |
| Total Expenses                                                    | Estimated          | Maximum            |
|                                                                   | <b>\$12,600.00</b> | <b>\$17,700.00</b> |

| Estimated Cost Breakdown | Estimated vs. Maximum |
|--------------------------|-----------------------|
|--------------------------|-----------------------|

Estimated Cost Breakdown by Category:

- Content Production: 43.65%
- Coordination: 19.84%
- Technology & Monitoring: 11.90%
- Asset Collection / On-site support: 12.70%
- Administration & Contingency: 11.90%

Estimated vs. Maximum Costs:

| Category                           | Estimated  | Maximum    |
|------------------------------------|------------|------------|
| Coordination                       | \$2,500.00 | \$3,500.00 |
| Content Production                 | \$5,500.00 | \$7,500.00 |
| Asset Collection / On-site support | \$1,600.00 | \$2,400.00 |
| Technology & Monitoring            | \$1,500.00 | \$2,300.00 |
| Administration & Contingency       | \$1,500.00 | \$2,000.00 |

### Figure C1

[illegible]

## Part 2: Communication Product

Tactic: Seen & Unseen: Behind the Care (Instagram + TikTok).

Product type: Social Media Campaign — 2 platforms × 2 images = 4 images.

### 1. Image 1 – Instagram - Carousel Cover (Canva, 2026)

This is the cover page of the official Instagram post. The dog is placed in the front to increase the attraction, and the background is the part of the work that people cannot see, so it is blurred (Anthropic, 2026). This format suits Instagram because it encourages users to stop, swipe, and engage with explanatory content.

### 2. Image 2 – Instagram - Reels Cover (Canva, 2026)

This is the cover image of the official Instagram reels. Short videos are also an entry point. This character expressions and simple video countdown are in line with the tone of short videos (Anthropic, 2026).

### 3. Image 3 – TikTok – Hook Video Cover (Google, 2026)

The title is very direct to tell the audience that they can see some content that they usually can't see (Anthropic, 2026), which can arouse people's curiosity.

### 4. Image 4 – TikTok - FAQ-Style Video Cover (Google, 2026)

This is in response to real queries that may have come from the comments throughout the campaign (Anthropic, 2026). It enables the organization directly to respond to people's questions in a timely manner and is more interactive, driving trust building.

# **#Campus Tour: “See the Care Behind the Paws”**

## **(Shared/ Owned Media)**

### **Part 1: Rationale**

#### **1. Introduction**

Currently, RSPCA Australia (RSPCA) is encountering a substantial “cognition gap” in relation to their shelters and decision-making process that hinders the development of trust amongst its stakeholders. The proposed rationale aims to utilise the concept of “See the Sweat, See the Care” as a new charity marathon activation tactic for City2Surf, under the “Open the Door to Care” campaign. Targeting 18-35 years old low involvement supporters, this tactic utilises Botan and Taylor’s (2004, p. 651) co-creational model to make the daily work of organisation more visible and understandable. By linking physical effort with animal care, this initiative goes beyond one-way communication and promotes true transparency and participation.

#### **2. Goal & Objective**

The tactic fulfills the main goal of raising awareness among the target audiences about the working process at RSPCA shelters. The main objectives are to gain more than 200,000 impressions overall by using UGC stories through the entire campaign, and getting 150 new members registered to participate in charitable work by RSPCA.

#### **3. Strategy**

The proposed communication strategy is based on the concept of “labour mirroring”, where the energy exerted by the target group is connected to the work done by the staff. According to Falkheimer & Heide (2018, p. 43), legitimacy is achieved through relational action, not just message management. The shift from “RSPCA needs help” to “Look at the hard work that goes into caring” elevates the strategy beyond mere messaging to a genuine exchange of ideas. In addition, this aligns with IMC planning process, Percy (2023, p. 251-267). RSPCA provides platforms and facilitates engagement, balancing authenticity with brand safety while maintaining strategic control.

#### **4. Targets**

Following Silverman and Smith’s (2024, pp. 87-123) strategic segmentation, this tactic identifies Low-Involvement Supporters as the Key Public.

- **Demographics:**

Urban Australians aged 18-35 (Gen Z and Millennials)

- **Psychographics:**

73% of Australian family own pets (Animal Medicines Australia, 2025), viewing them as family and prioritising value-based spending despite rising cost-of-living pressures (Animal Medicines Australia, 2025).

- **Media Behaviour:**

18-34s are the primary social media users in Australia, with TikTok (18-24s) and Instagram (25-34s) being the dominant platforms. User-Generated Content (UGC) has become one of the most powerful growth levers for modern brands, acting as a powerful digital word-of-mouth (TheHypeSociety, 2025).

- **Message Framing:**

Centres on “labour mirroring”. Narratives must be authentic and resonant (TheHypeSociety, 2025).

## **5. Tactic: Charity Marathon: “See the Sweat, See the Care”**

### **5.1 What & Why**

Although RSPCA has collaborated with marathon events in the past, it failed to make good use of the popularity in such national activity. Relying solely on low-visibility official posts, it also failed to effectively convey the “process” of care. Therefore, the proposed tactic is a 6-week event, the main social media are Instagram and TikTok (#TeamRSPCA2027). Instagram is selected as the primary channel because it is one of the most frequently used platforms by targets (Gen Z and Millennials), and it is highly visually driven, meeting the requirements of events (Watt, n.d.). At the same time, taking advantage of TikTok’s high level of engagement, with an average of over 42 hours per month (Bencic, 2024). Both prefers the genuine and unpolished UGC content that this activity pursues (The Hypesociety, 2025).

Based on the co-creational model (Botan & Taylor, 2004, p. 651), this community-led tactic uses “Labour Mirroring” to bridge the knowledge gap. By providing a platform to facilitate and encourage UGC production, runners’ physical exhaustion becomes a direct synonym for staff rescue labour, making the concept easier to grasp whilst fostering empathy and a sense of shared values, thereby transforming “running” into a symbolic act of expressing support.

### **5.2 How: Implementation Details**

This event will be managed by the RSPCA social media team and Echo PR, initiated by RSPCA, 10 influences, and all available RSPCA supporters, they will receive a digital toolkit to warm up the narrative.

Over 6 weeks, the RSPCA Instagram/TikTok official account and Instagram Broadcast Channel serve as an informal hub for weekly “behind-the-scenes” staff updates and competition interactions to build online community and enhance interaction. Instagram’s automatic reply DM links the competition photos submitted by targets with real-time rescue facts, which is a form of organizational transparency “visualisation”. Meanwhile, throughout the entire event period, the content of social media accounts needs to add a “one-click” button (leading to interfaces such as donations, assistance, adoption, and volunteer registration) to increase subsequent conversions.

This plan gradually evolves from pre-game warm-up to on-site interactive experience. Refuel at key locations (5km, 10km, Heartbreak hill) using labor mirror copies and CTA-driven refueling signs. These markers transform the runners’ fatigue into a concrete understanding of the labour of animal care. During and after event, raw materials are repurposed for TikTok/Reels, encouraging UGC via #TeamRSPCA to enhance exposure and achieve a long-tail effect for the event.

### **5.3 PESO Integration**

Following the SOEP Model (Macnamara et al., 2016), this tactic though Owned Media frames the narrative. Shared media (#TeamRSPCA UGC) drives reach and builds earned credibility. Paid media (influencer marketing) supports initial traction and mid-campaign growth, recognising its strong engagement value (Forlani, 2025).

### **5.4 Innovation Factor**

This “Innovation in Communication Architecture” ensures that the RSPCA emerges as a storyteller and facilitator, not a transmitter. The creation of a digital-physical connection ensures that community involvement showcases organisational transparency, replacing mere messages with actual experiences.

## **6. Budget, Timeline & Evaluation**

This is a 6-week campaign with a total zero-based budget (Smith, 2005, p.226), amounting to \$24,100 (see Appendix A), with the production of offline materials, influencer fee, staff expenses and so on.

The timeline (see Appendix B) starts from the week 1 (Influencer preheating), followed by Weeks 2-4 engagement (Instagram/TikTok posts & shorts; Broadcast Channel updates etc.), peaking at Week 5 race day activation.

Evaluation follows Macnamara’s (2017) model, ensuring every dollar effectively facilitates transparency and generates measurable stakeholder resonance.

- **Outputs:**

- Engagement rate of event-related Owned media content
- Impressions for the #TeamRSPCA hashtag

- **Outcomes:**

- A post-event survey (measure shifts in targets’ understanding of RSPCA shelter operations and trust)

## **7. Conclusion**

“See the Sweat, See the Care” marathon is an integral part of “Open the Door to Care”. The connection between the physical efforts of the target audience and the hard work of RSPCA staff has created the necessary cognitive and emotional connections. This method replaces the official rigid promotion of the organisation with community-led advocacy, effectively changing supporters with low participation become an informed and active stakeholder. The measure of success is not only the funds raised, but also the significant narrowing of the knowledge gap and the actual growth of engagement aged 18 to 35.

## Part 2 Communication Products

### 1. Marathon on-site mock-up image

A mock-up of the RSPCA Marathon event (see Appendix C), featuring cheering crowds, “labour mirroring” copies (Gemini, 2026a).

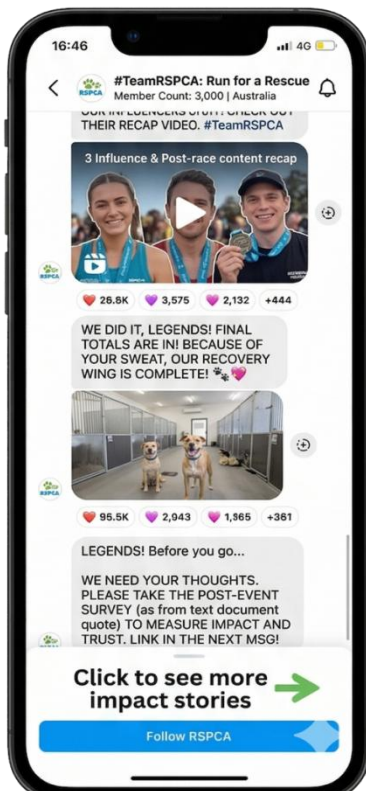

### 2. RSPCA Instagram automated DMs mock-up image

Mock-up of the RSPCA’s Instagram automated DM replies (see Appendix C), delivering RSPCA animal care information more effectively to the targets (Gemini, 2026b)

### 3. RSPCA Instagram Broadcast Channel mock-up image

RSPCA Instagram Broadcast Channel mock-up (see Appendix C), through this channel to build a more effective and powerful online community (Gemini, 2026c).

### 4. RSPCA TikTok shorts mock-up image

RSPCA TikTok Shorts mock-up (see Appendix C), including a “One-Click” button to improve conversion rates (Gemini 2026d).

# **Campus Tour: “See the Care Behind the Paws”**

## **(Shared/ Owned Media)**

### **Part 1 — The Rationale**

#### **1. Introduction**

This campaign, “Open the Door to Care,” focuses on strengthening public connection with RSPCA by making shelter practices more visible and relatable. Within this campaign, I am responsible for the Campus Tour: “See the Care Behind the Paws” tactic. This initiative targets low-involvement supporters, particularly university students aged 18–25 across institutions such as UNSW, USYD, and UTS during O-Week 2027, and based on the previous O-Week schedule, the campaign is scheduled to run mainly from 1–28 February 2027. And throughout the entire period from before the event starts until after it ends, cooperate with the promotion on social media. Through visually engaging displays and emotionally resonant storytelling, the tactic re-frames animal care as accessible and participatory, positioning students as potential advocates whose attention, presence, and engagement can meaningfully contribute to animal welfare.

#### **2. Goal(s) and objectives (s)**

The primary goal of this tactic is to enhance the target public’s understanding of RSPCA shelter operations, including animal care processes and decision-making contexts, in order to reduce misunderstandings caused by limited or inaccurate information. By improving transparency and knowledge, the campaign aims to foster more informed, consistent support and engagement from the audience.

To support this goal, the objective is to increase the proportion of the target audience who identify as “somewhat familiar” or “very familiar” with RSPCA shelter operations to 65% within three months. This will be measured through post-campaign surveys and engagement metrics.

### **3. Strategy**

This strategy focuses on engaging low-involvement audiences by making animal care visible, relatable, and emotionally accessible . The approach using visually engaging displays (social sharing and animal interaction) and emotional storytelling (storytelling sessions) to capture attention without requiring high cognitive effort. Students provided feedback on their interests and values through participation and sharing, and the organization adjusted its presentation methods based on this feedback (Grunig & Hunt, 1984). By situating the experience within familiar campus environments, the strategy lowers participation barriers and encourages students engagement. It also positions involvement as simple and achievable, students can contribute to through everyday actions such as attention, sharing, and participation.

### **4. Targets**

The primary target audience for this tactic is low-involvement supporters, specifically university students aged 18–25 studying in Sydney, including UNSW, USYD, and UTS. According to Silverman D. A. and Smith R. D., this group can be classified as a “latent public,” characterized by low-involvement supporters . While they are familiar with RSPCA, but their knowledge of shelter operations remains limited. We try to increase their awareness while ensuring they are as actively involved as possible. Also, participants are encouraged to share their moments on social media by posting videos to TikTok and sharing live updates on Instagram.

### **5. Tactic**

The core message, animal care is transparent, thoughtful, and open to public support—will be communicated through visually engaging displays (Peak engagement activity) and short-form videos showing daily shelter routines will be played in the booth. Emotional storytelling (Storytelling sessions) and interactive elements (“Step Into Their Paws” Simulation Game ) are used to reduce cognitive effort and encourage quick, intuitive engagement among students.

To maximize reach and effectiveness, this tactic adopts an integrated approach guided by the PESO Model (Macnamara et al., 2016) . Owned media includes official event pages, on-site signage, and digital content produced by RSPCA. Shared media is activated through user-generated content, encouraging students to post photos or videos using campaign hashtags (e.g., #SeeTheCare) when they are in our booth during Phase 2: O-week activity, thereby extending visibility within peer networks.

Take UNSW as an example, earned media like UNSW Newsroom generated through partnerships with university societies, such as UNSW Animal Welfare Society and student organizations like Arc @ UNSW, which promote the event via newsletters and social media. Additional exposure is gained through campus media, including student newspapers like Tharunkais (the official student newspaper of UNSW) and university-managed Instagram accounts like UNSW Sydney official Instagram (@unsw) , enhancing credibility through peer endorsement.

In practice, the campus tour will be delivered as a 2–3 day pop-up activation at each university during their O-Week, a high-traffic period for student engagement. The space will be staffed by trained volunteers and representatives who facilitate interactions and provide accessible explanations of shelter processes. Additional engagement mechanisms, such as small giveaways (stickers in cute animals shape) are incorporated to attract attention and sustain participation. By combining on-site experience with digital amplification, the tactic ensures the message is delivered in a way that is immediate, shareable, and memorable.

## **6. Budget, Timeline, & Evaluation**

## 6.1. Budget:

| Campaign Budget            |                                      |                                                 |            |
|----------------------------|--------------------------------------|-------------------------------------------------|------------|
|                            | Activity                             | Activity                                        | Cost (AUD) |
| Phase 1: Pre-Campaign      | Social media content                 | Design of Instagram, TikTok, X visuals          | \$80       |
|                            | Short videos (rescue animals)        | Filming + basic editing+Actor's performance fee | \$150      |
|                            | Collaboration with student societies | Printing posters, banners + small incentives    | \$120      |
|                            | Paid promotion (social ads)          | Boost posts for reach                           | \$150      |
| Phase 1 Total Cost         |                                      |                                                 | \$500      |
| Phase 2: O-Week Activation | Booth setup                          | Table, banners, signage                         | \$200      |
|                            | Storytelling sessions                | Printed materials, visuals                      | \$80       |
|                            | Interactive activity (game)          | Props, printed cards, design                    | \$120      |
|                            | Animal interaction                   | Transport, safety equipment                     | \$150      |
|                            | Sign-up materials                    | QR codes, flyers, forms print out               | \$50       |
|                            | Social media coverage                | Live posting + content capture                  | \$100      |
| Phase 2 Total Cost         |                                      |                                                 | \$700      |
| Phase 3: Post-Campaign     | Volunteer follow-up                  | Admin + communication                           | \$50       |
|                            | Social media recap                   | Editing photos/videos                           | \$100      |
|                            | Reporting & metrics                  | Data analysis tools                             | \$50       |
| Phase 3 Total Cost         |                                      |                                                 | \$200      |
| Tactic Total Cost          |                                      |                                                 | \$1400     |

## 6.2. Timeline and Activity Schedule:

### 6.1.1. Phase 1: Pre-Campaign: Preparation for promoting the event (1 Feb 2027-15 Feb 2027)

- (1) Social media teaser content, like Instagram, TikTok and X
- (2) Short videos featuring rescue animals
- (3) Collaboration with student societies

| Campaign Plan: "Open the Door to Care: See the Care Behind the Paws" |            |             |             |                 |             |             |
|----------------------------------------------------------------------|------------|-------------|-------------|-----------------|-------------|-------------|
| Task Name                                                            |            | Start Date  | End Date    | Duration (days) | Status      |             |
| Phase 1: Pre-Campaign                                                |            | 1 Feb 2027  | 15 Feb 2027 | 15              | Not Started |             |
| Phase 2: O-Week Activation                                           |            | 15 Feb 2027 | 19 Feb 2027 | 5               | Not Started |             |
| Phase 3: Post-Campaign Follow-up                                     |            | 19 Feb 2027 | 28 Feb 2027 | 10              | Not Started |             |
| 1 Feb 2027                                                           | 5 Feb 2027 | 10 Feb 2027 | 15 Feb 2027 | 20 Feb 2027     | 25 Feb 2027 | 28 Feb 2027 |
|                                                                      |            |             |             |                 |             |             |
|                                                                      |            |             |             |                 |             |             |
|                                                                      |            |             |             |                 |             |             |

(Position the two tables horizontally, with specific dates displayed on the left and the duration in days on the right.)

| Campaign Plan: "Open the Door to Care: See the Care Behind the Paws" |             |             |                 |             | 1 Feb 2027 | 5 Feb 2027 | 10 Feb 2027 | 15 Feb 2027 | 20 Feb 2027 | 25 Feb 2027 | 28 Feb 2027 |
|----------------------------------------------------------------------|-------------|-------------|-----------------|-------------|------------|------------|-------------|-------------|-------------|-------------|-------------|
| Task Name                                                            | Start Date  | End Date    | Duration (days) | Status      |            |            |             |             |             |             |             |
| Phase 1: Pre-Campaign                                                | 1 Feb 2027  | 15 Feb 2027 | 15              | Not Started |            |            |             |             |             |             |             |
| Phase 2: O-Week Activation                                           | 15 Feb 2027 | 19 Feb 2027 | 5               | Not Started |            |            |             |             |             |             |             |
| Phase 3: Post-Campaign Follow-up                                     | 19 Feb 2027 | 28 Feb 2027 | 10              | Not Started |            |            |             |             |             |             |             |

### 6.1.2 Phase 2: O-Week Activation (15 Feb 2027-19 Feb 2027)

- (1) Booth opens: Welcoming visitors, introducing the campaign, and guiding them through the experience.
- (2) Storytelling session 1: Sharing real rescue stories to build emotional connection and initial engagement.
- (3) Peak engagement activity: Interactive activity designed to attract attention and maximise student participation.
- (4) Storytelling session 2: Providing deeper insights into animal care processes and decision-making.
- (5) "Step Into Their Paws" Simulation Game: An immersive activity allowing participants to experience shelter challenges from an animal's perspective. An interactive game where students role-play a stray animal, make survival choices, and receive an outcome based on their decisions.

(6) Animal interaction: Supervised interaction with animals to create emotional bonding and memorability.

(7) sign-ups: Encouraging students to register for volunteering, updates, or future involvement.

(8) social sharing: Motivating participants to share experiences online using campaign hashtags.

| Daily Schedule for Phase 2: O-Week Activation |            |          |                       |             |
|-----------------------------------------------|------------|----------|-----------------------|-------------|
| Activity Name                                 | Start Time | End Time | Durations ( minutes ) | Status      |
| Booth opens                                   | 10:00      | 11:00    | 60                    | Not Started |
| Storytelling session 1                        | 11:00      | 11:30    | 30                    | Not Started |
| Peak engagement activity (games / giveaways)  | 11:30      | 13:00    | 90                    | Not Started |
| Storytelling session 2                        | 13:00      | 13:30    | 30                    | Not Started |
| “Step Into Their Paws” Simulation Game        | 13:30      | 15:00    | 90                    | Not Started |
| Animal interaction                            | All day    | /        | /                     | Not Started |
| sign-ups                                      | All day    | /        | /                     | Not Started |
| social sharing                                | All day    | /        | /                     | Not Started |

### 6.1.3. Phase 3: Post-Campaign Follow-up (19 Feb 2027-28 Feb 2027)

(1) Thank-you emails to participants

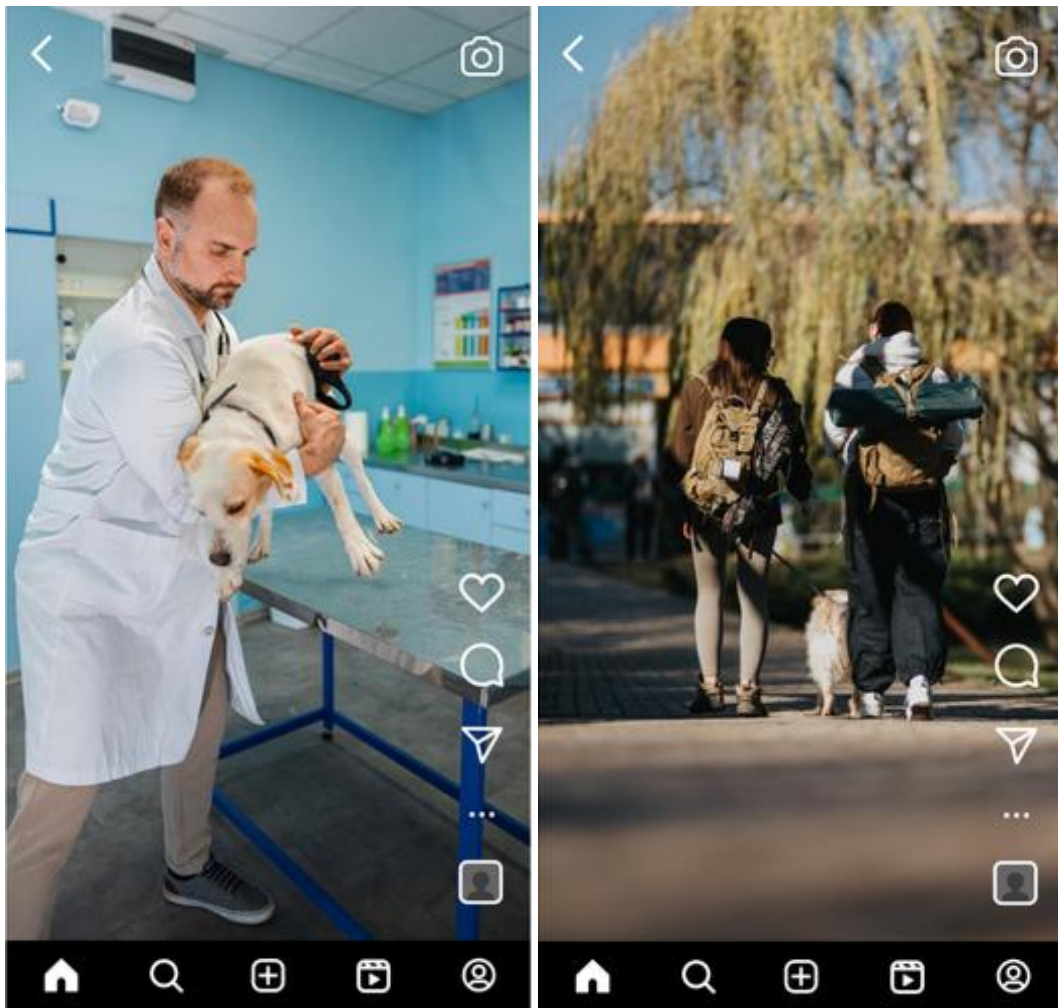

(2) Follow-up on volunteer registrations

(3) Social media recap, like photos, impact metrics

## ● 7. Conclusion & Expected Outcomes

In conclusion, through activities such as storytelling sessions, the “Step Into Their Paws” simulation game, and supervised animal interaction, this tactic makes RSPCA care processes visible and emotionally engaging. As the start tactic of the our campaign, our expectation is that through this tactic, we can attract more people's attention, build momentum for our event, and keep following up on our subsequent activities and plans.

## RSPCA Shelter Open Day (Paid/ Earned/ Shared/ Owned Media) —Tactic Title:

### Open Doors, Open Truths

#### Part 1: Rationale

##### 1. Introduction

RSPCA Australia's communication problem is not low awareness, but limited public understanding of how shelter operations and decision-making are carried out. Because of this gap in understanding, RSPCA is easily affected by one-sided content and emotional controversy on social media. Survey results show that 48.5% of respondents are unfamiliar with shelter operations, 81.8% chose "No" or "Not sure" on euthanasia-related issues, and 56.3% believe behind-the-scenes content can help them understand RSPCA's work (Li et al., 2026, p. 4). In response, *Open Doors, Open Truths* targets high-involvement scepticss. Kim and Grunig (2011, p. 125) argue that high-involvement publics usually take the initiative to find and screen issue information, so direct witnessing and on-site questioning are more persuasive than one-way explanation.

##### 2. Goals and Objectives

This activity directly serves the campaign goal of improving RSPCA organisational transparency. Specifically, it corresponds to Objective 2: increasing the target audience's average transparency rating from 3.66 to 4.0 (5 points) within three months (Li et al. 2026, p. 6). This activity also indirectly helps the public better understand shelter processes, but it does not primarily serve the campaign's reach or registration goals, which are covered by other tactics. For high-involvement scepticss, the main issue is not the lack of awareness, but

lack of understanding of complex decision-making. Therefore, the open day is a suitable response to this objective.

### **3. Strategy**

The core communication strategy of this activity is transparency through witnessing. Instead of emphasising RSPCA's transparency through one-way explanation, it is better to let the target public see the real operation process of the shelter directly. This strategy is consistent with the campaign theme of Open the Door to Care, which aims to make people, process and care visible. Falkheimer and Heide (2018, p. 43) argue that organisational legitimacy is built more through relational action, rather than through message management. For RSPCA, it is difficult to effectively respond to the questions of high-involvement scepticss by official explanations alone, so a more interactive and visible approach is needed through the shelter open day.

### **4. Targets**

#### **Demographics**

The core target group of this activity is high-involvement scepticss, the adult who continue to pay attention to animal welfare issues and will contact the relevant controversy through news or social media. In Australia, 73% of families have pets, indicating that animal welfare is highly related to daily life (Animal Medicines Australia, 2025, p. 1).

#### **Psychographics**

This group values animal welfare, accountability and procedural transparency, and responds strongly to issues such as euthanasia, resource allocation and shelter decision-making. But their understanding of RSPCA's operating logic is incomplete. Hallahan (2000, pp. 504, 510) regards this kind of public as a highly involved public in need of explanation and response.

#### Media behavior

They are more likely to seek, screen and discuss relevant information. A quarter of the Australian public uses social media as a main source of news; among people aged 18-24, Instagram (40%) and TikTok (36%) are the main news platforms (University of Canberra News & Media Research Centre, 2025). Kim and Grunig (2011, p. 125) also note that the highly involved publics actively find, screen and disseminate information on issues.

#### Message framing

Therefore, this activity should not ask the public to simply "believe in RSPCA," but to "look at the whole process before judging the decision."

### **5.Tactic**

Open Doors, Open Truths is a two-stage shelter open day tactic, held on 6–7 March 2027 and 17–18 April 2027, as the core activity responsible for offline transparent communication in the Open the Door to Care campaign. It was chosen because the main communication obstacle is not the lack of public attention, but the lack of understanding of RSPCA shelter operations and decision-making. A1 survey results show that 56.3% of the respondents believe that behind-the-scenes content can help them better understand the work

of RSPCA (Li et al., 2026, p. 4), so the focus of this activity is to transform the real shelter process itself into communication content.

This activity mainly targets high-involvement scepticss, so it emphasises real process, staff explanation and open Q&A, rather than one-way instruction. Each round uses pre-registration and group-guided tours through intake, treatment or recovery, assessment and adoption preparation, and other key areas. After signing in, participants receive an activity manual including the schedule, FAQs, and common misunderstandings with factual explanations. The activity includes four parts: a guided behind-the-scenes tour, a real case explanation session, myth-vs-fact and live Q&A, and post-event sharing. This design allows the public to see the real shelter process and better understand the background of complex decision-making. It also echoes Falkheimer and Heide (2018, p. 43), who argue that organisational legitimacy is built more through relational action than through message management alone.

From the perspective of PESO, the activity itself, registration page, FAQ, activity manual and recap content are owned media; media and creator releases are earned media; participants' sharing and comments on social platforms are shared media; small-scale targeted promotion is paid media. The innovation of this tactic is that it restructures the ordinary open day into a participatory transparency experience, turning the judgement process itself into communication content and responding more directly to the questions of high-involvement scepticss.

## **6. Budget, Timeline & Evaluation**

The total budget for the two rounds of activities is expected to be AU\$5,400, mainly including: signage and printed materials (AU\$1,000), registration materials (AU\$300), refreshments (AU\$600), photo/video documentation (AU\$1,000), staff support and event materials (AU\$1,200), paid social promotion (AU\$700), media kit printing (AU\$300) and contingency fund (AU\$300).

In terms of schedule, planning, staff briefing, materials design and registration setup will be completed in February 2027; the first round will be held on 6-7 March 2027; Q&A materials will be refined in mid-to-late March; the second round will be held on 17-18 April 2027; and final evaluation will be completed in late April.

Evaluation will focus on Objective 2, comparing changes in participants' transparency perception and recording attendance, Q&A participation, participant feedback, media coverage, and social media engagement.

## **7. Conclusion & Expected Outcomes**

Open Doors, Open Truths is the key tactic responsible for offline transparent communication in the Open the Door to Care campaign. It responds not to low public awareness of RSPCA, but to limited understanding of shelter operations and decision-making. Through two rounds of shelter open day, this activity puts abstract and emotional disputes back into a clearer organisational context, allowing participants to see the real process and understand staff judgment. If implemented appropriately, this activity is expected to improve the target audience's evaluation of RSPCA organisational transparency, reduce misunderstandings

about complex decision-making, and provide more convincing offline evidence and follow-up content for the overall campaign.

## Part 2: Communication Product

# #Community Story Sharing: UGC Challenge

## (Earned/ Shared/ Owned Media)

### Part 1: Rationale

#### 1. Introduction

Due to the opaque rescue process, the RSPCA is experiencing a trust crisis at the moment. Many of the stakeholders are questioning this charity organization. The result of our A1 primary research is that 78.1% of the respondents are aged 18-25, which is a digital-native bracket that consume and share pet-related information via Instagram and Facebook (72.7% reliance) (Wang et al., 2026). 53.1% of the respondents choose to be influenced by the personal story in forming their opinion towards the RSPCA. This rationale proposes the #SeeTheCare User-Generated Content (UGC) challenge, which target at "High-Involvement Supporters" in this bracket. Shift the narration from RSPCA's official account to a first person, this tactic is using the co-creational model by Botan and Taylor (2004, p. 651) to fill the gap of knowledge through peer-to-peer validation.

#### 2. Goals & Objectives

The strategy is to decentralise RSPCA's messaging by making the core advocates first person defenders of the realities of the shelter. On our main data, only 12.5% of the respondents were changed by the official posts (Wang et al., 2026). Following the Situational Crisis Communication Theory of Coombs (2007, p. 168), this tactic is the replacement of a non working corporate defence with a relational action (Falkheimer & Heide, 2018, p. 43). In particular, to rebuild fully public trust on the controversial open-admission policy, a digital

social proof must be tied to the physical reality. By actively pushing the supporters to register for visiting the shelter offline, the RSPCA proved it has nothing to hide. By giving these supporters, which are at least by that, verified, a digital platform to share the emotional feeling without filter, the RSPCA let the peer-validated social proof to naturally take down the public scepticism and the algorithmic misinformation.

### **3. Strategy**

The strategy is to decentralise RSPCA's messaging by making the core advocates first person defenders of the realities of the shelter. On our main data, only 12.5% of the respondents were changed by the official posts (Wang et al., 2026). Following the Situational Crisis Communication Theory of Coombs (2007, p. 168), this tactic is the replacement of a non working corporate defence with a relational action (Falkheimer & Heide, 2018, p. 43). To rebuild fully public trust on the controversial open-admission policy, a digital social proof must be tied to the physical reality. By actively pushing the supporters to register for visiting the shelter offline, the RSPCA proved it has nothing to hide. By giving these supporters, which are at least by that, verified, a digital platform to share the emotional feeling without filter, the RSPCA let the peer-validated social proof to naturally take down the public scepticism and the algorithmic misinformation.

### **4. Targets**

By applying Kim and Grunig's (2011, p. 132) Situational Theory of Problem Solving (STOPS), we choose "High-Involvement Supporters" (aged 18-25) as our active public. These are the people who are exemplified by university students and young professionals. They have high "problem recognition" and "constraint recognition" of the hard reality of

medical triage in open-admission shelters. They are active information seekers but suffer from "advocacy fatigue" when encountering the online negativity. Since 53.1% of our surveyed respondents indicated that they are deeply moved by "personal stories" (Wang et al., 2026), it is the most statistical way to break through their digital echo chambers by empowering this demography with creating UGC on Instagram and Facebook. They are micro influencers in their own peer network and deliver authenticated messages that can not be done by media channels.

## **5. Tactic**

The #SeeTheCare challenge (Mar 26 - Apr 9, 2027) is a 15day intensive UGC sprint that will mobilize supporters to share real unfiltered stories of rehabilitation on Instagram and Facebook.

Execution Phasing: There are two important phasing of this tactic. In the first phase - seeding: 15 veteran foster carers are called in to start the campaign, to set an authentic visual and story benchmark. In the second phase is public amplification. We need to run the 150 offline conversions in this very short time frame. who is tagging @RSPCA and using the #SeeTheCare (in the photo caption), they will be in lucky draw to win one of the 150 Exclusive VIP Packages (which is a VIP Invitation to the Behind-the-Scenes Tour AND a Royal Canin Pet Gift Card that can redeem strictly at the offline event).

Platform Synergy: These community stories are always selected and shown on an own "Wall of Care" mobile landing page. This is the main conversion place, where the digital empathy produces the real action. All the amplified socials post and the landing page have in the most visible way a Call-to-Action (CTA): "Write your story in order to get a VIP Invite & Royal Canin!".

PESO & Innovation: This, operates mostly as a Shared media tactic (use of the network effects of the 18-25 demographic) to get the 200.000 impressions. It is supported by Owned media (the registration portal) to get the 150 offline leads. The Innovation Factor is structural: it is a radical inverted of the classic communication, from consumer of the message to the sender of the message (Botan & Taylor, 2004, p. 651).

## 6. Budget, Timeline & Evaluation

Obj3 : To generate over 200,000 total impressions across all campaign platforms through UGC and digital storytelling, while securing at least 150 new registrations for off-line activities within 3 months. (Wang et al., 2026)

| Category & Item                                                               | Budget  | Timeline Allocation                                      | Evaluation Framework (vs. Obj 3)                                                                        |
|-------------------------------------------------------------------------------|---------|----------------------------------------------------------|---------------------------------------------------------------------------------------------------------|

| <b>Content &amp; Seeding:</b>                                                 | \$6,000 | Pre-Launch:<br>Compensating creators                     | Quality (Qual): Post-test sentiment analysis on user                                                    |

| Category & Item                                                | Budget                          | Timeline Allocation                                                 | Evaluation Framework (vs. Obj 3)                                                                             |
|----------------------------------------------------------------|---------------------------------|---------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|
| Visuals & 15 seeded creators                                   |                                 | to set a high-quality UGC benchmark.                                | comments to verify attitude shifts.                                                                          |
| <b>Paid Amplification:</b><br><br>Targeted boosting on IG & FB | \$3,500                         | Mar 26 - Apr 9: Live push during the intensive 15-day sprint.       | Reach (Quant): Platform analytics monitor amplified reach among the 18-25 demographic.                       |
| <b>Incentives (In-kind):</b><br><br>Royal Canin VIP Gift Cards | \$0<br><br><i>(Sponsorship)</i> | Post-Campaign:<br><br>Redeemed exclusively at the offline Open Day. | Conversion (Quant): Portal backend verifies the acquisition of >150 new offline High-Involvement Supporters. |

## 7. Conclusion & Expected Outcomes

In this way, the #SeeTheCare campaign is at the minimum solving the credibility deficit that the top-down corporate public relations can not solve, by choosing and giving power to the

stories of the high-involvement supporters that have already been authenticated. During these 15 days intensive sprint (Mar 26 - Apr 9, 2027), the conversion of the frustration of the advocates in digital social proof will be able to produce 200.000+ impressions. With the scattering of the scarcity and with the win of a VIP-package (the Invitation + the Royal Canin) in front of them, this momentum will be systemically driven to get 150+ of the offline High-Involvement Supporters. In the end, we will have a fold of community buffer that will protect RSPCA reputation with an advocacy informed by peer validated, so that the organization will have long term social license to operate.

## Situation Analysis

**My dog and the RSPCA**

Hi,

My dog was hit by a car on Tuesday, 2 of her legs were broken, despite a payment of \$2000 from a good samaritan, she was sent home without further treatment except for methadone and dressing around her legs. She seemed in good spirits, however she could not get up to pee, poo, drink, or eat. In the meantime we were looking for ways to find a vet or the animal welfare that would take care of the surgery and allow us to pay it back later. I am in a single income household with people I take care of. She was taken to the vet a few times and was refused surgery unless we put down a deposit of \$6000 which I simply didn't have. I got home from work and an RSPCA associate was at the door trying to get in while my family member was inside. The associate stated that we were mistreating our dog of 8 years whom we love so much. She must've been notified by the vet that sent us away. My family member refused to let the RSPCA take her due to her fears of our dog not being operated on but instead euthanised. The RSPCA called the police to have the dog removed. The associate and the police made sure nothing would happen to our dog without our consent. The associate took our dog to the emergency room about thirty minutes away and I get a phone call an hour later saying my dog has been euthanised. We didn't even get to say goodbye. She explained her pelvis was shattered and two of her legs were broken. I was shocked why they put her down, because my dog was in good spirits before leaving, and I know they could have operated on her. She said there was nothing she could do. But I know if we had the money at the vet she would still be here. The RSPCA claim to protect animals but they resort to the cheapest option possible instead of fulfilling their duty. My dog is now in a fridge.

### Vulnerability

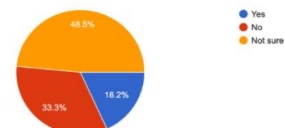

Susceptible to One-Sided Narratives

**Reactive Defense** ➡ **Proactive Transparency**

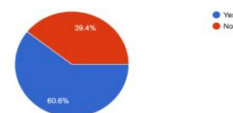

### The Paradox

High Awareness vs. Low Understanding

Q3. Do you know how RSPCA makes decisions regarding animal euthanasia?  
 33 responses

Q1. Have you heard of RSPCA Australia?  
 33 responses

# Stakeholder

## MAPPING (Grunig & Hunt, 1984)

1. **Enabling:** Government and regulatory bodies
2. **Functional:** Staff, volunteers and donors etc.
3. **Normative:** Australian Veterinary Association and other welfare organisations
4. **Diffused:** Digital activists and broader audiences

From uninformed observers  
to stable, informed supporters

### Why Them?

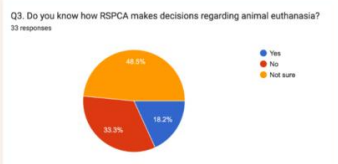

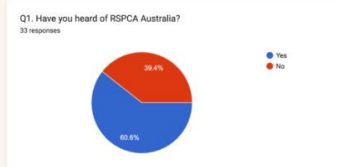

They are key drivers of public opinion and potential volunteers/donors, but also the main group holding misunderstandings.

The Shift

## Key Insights

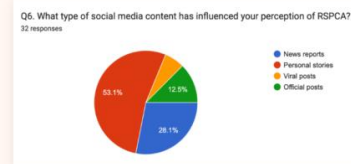

### Insight 1

#### Cognition Gap

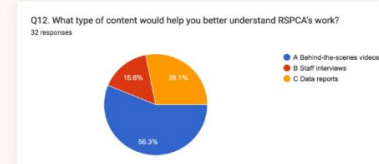

### Insight 2

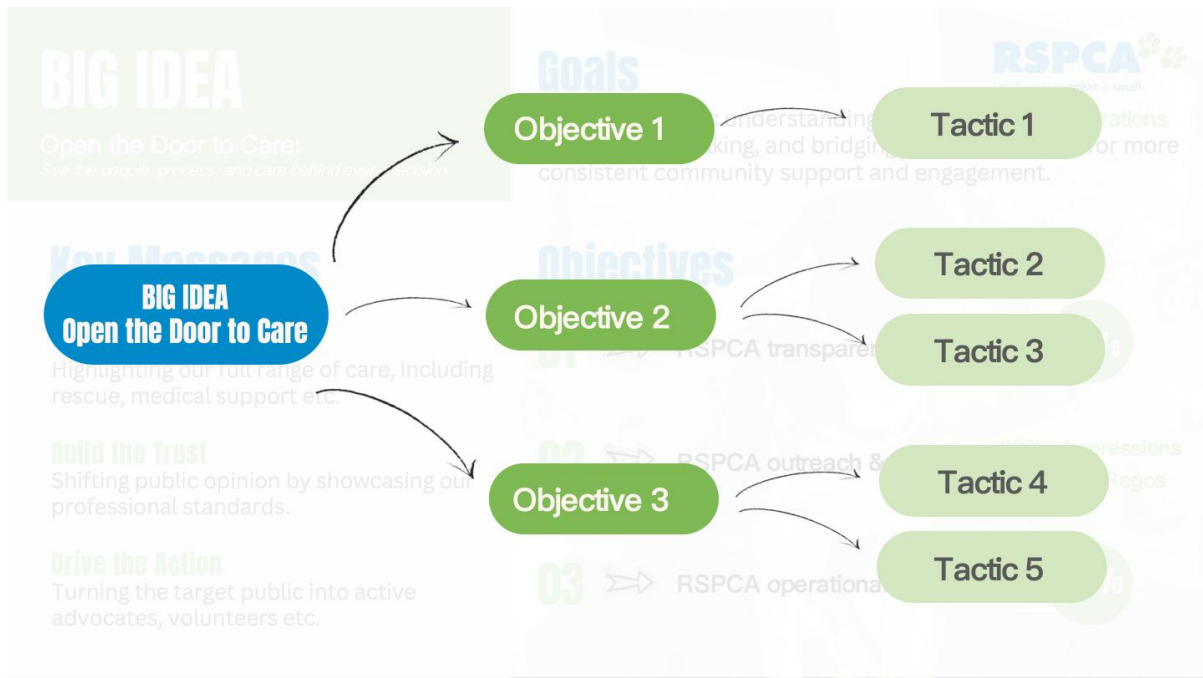

#### Engagement Preference

### Insight 3

#### Content Demand

## Tactic 1 Shelter Open Day “Open Doors, Open Truths”

### Targets: High-involvement sceptics

- 18-35 years old
- Values-driven and highly sensitive: Respond strongly to “hot-button” issues (e.g. euthanasia)
- Information seekers  
Proactive and critical; Preferring direct observation, BTS content

### PESO (Spin Sucks, n.d.)

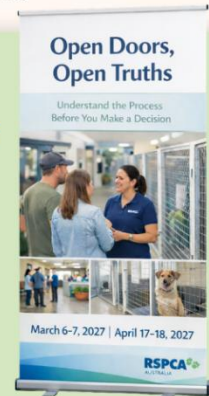

- Core Drivers (Owned & Shared)  
Media kit, organic participant sharing etc.
- Targeted Support (Paid)
- Persuasive Impact (Earned)

### Open Day Highlights

From “Tour” to “Real Experience”;  
A Participatory Transparency Experience

- Behind-the-Scenes Access
- Real Talk & Truths
- Myth-vs-Fact Zone

## Tactic 2 Charity Marathon

## “See the Sweat, See the Care”

### Targets: Low-involvement supporters

- 18-35
- Pet-loving
- Instagram and TikTok
- Care animal welfare, without shelter operation

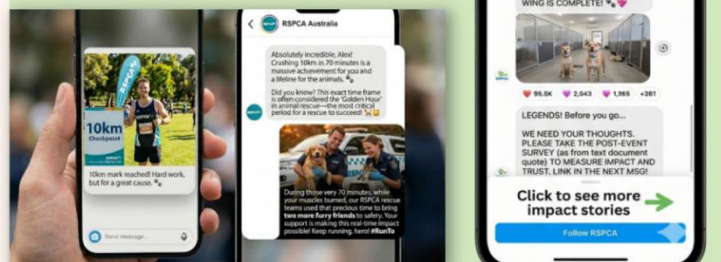

### PESO (Spin Sucks, n.d.)

- Owned: Framing and conversion
- Shared: Reach and UGC
- Paid: Early promotion
- Earned: Secondary outcome

### Implementation Details

- 6-week social media warm-up
- Broadcast Channel for real-time updates
- Auto-reply messages with rescue facts
- One-click links for donation and sign-up
- Race-day signs connecting effort with care work
- Reels and UGC to extend reach

Objective 2 200k+ Impressions  
150+ New Regos

## Tactic 3 Community Story Sharing UGC “#SeeTheCare”

### Objective 2 ✓

200k+ Impressions  
150+ New Regos

### Targets: High-involvement supporters

- 18–25
- University students, young professionals
- Active information seekers
- Affected by online negativity and personal stories
- Strong peer-to-peer advocacy potential

### PESO (Spin Sucks, n.d.)

- Shared: UGC reach and social proof
- Owned: Landing page and registration conversion
- Paid: Targeted boosting
- Earned: Secondary outcome

### Implementation Details

- 15-day Instagram and Facebook UGC sprint
- Seeded by 15 foster carers
- Supporters post real stories with #SeeTheCare and @RSPCA
- Best posts featured on the Wall of Care
- VIP tours and rewards drive offline sign-up
- Shared media for reach, owned media for conversion

## Tactic 4 Campus Tour “See the Care Behind the Paws”

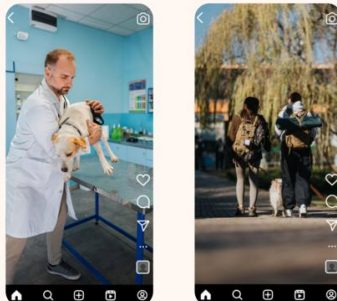

### ✓ Objective 3

**RSPCA shelter operations familiarity**

“somewhat familiar” or “very familiar”  
within 3 months

65%

### Campus activation mock-up visuals

Source: A2 communication product mock-up

### 2-3 Day 0-Week Pop-up Activation

#### Target

- Low-involvement supporters
- Priority audience: 18–25 university students
- A latent public (Silverman, D. A., & Smith, R. D. 2024) with goodwill but limited shelter understanding

#### Execution

- Visual displays and short-form videos
- Storytelling sessions
- “Step Into Their Paws” simulation
- Animal interaction and on-site sign-up

#### PESO (Spin Sucks, n.d.)

- Owned: event page, on-site materials and official content
- Shared: student posts and hashtag sharing
- Earned support: campus societies and media amplification

Abstract shelter work ➡ Visible, relatable care

Value: A low-barrier entry point that builds first familiarity through participation.

## Tactic 5 "Seen & Unseen: Behind the Care"

✓ **Objective 3** RSPCA shelter operations familiarity **65%**

**Outcome only** ➔ **Process + Context**

### 12-Week Instagram + TikTok Explainer Series

#### Platform Design

Source: A2 communication product mock-up

**Main explainer channel**

**Entry point:**  
Hook + FAQ videos

**Seen + Unseen:** Explains what happened, why and behind-the-scenes

**Target**

- Low-involvement sceptics
- 18-34 Instagram and TikTok users
- Low familiarity, more influenced by social media, news and peers

**PESO**  
(Spin Sucks, n.d.)

- Owned: official Instagram and TikTok content
- Shared: comments, shares, saves

**Campaign Integration**

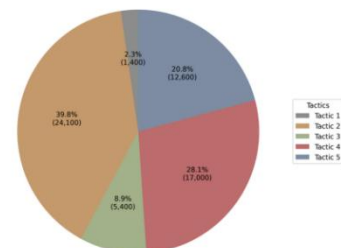

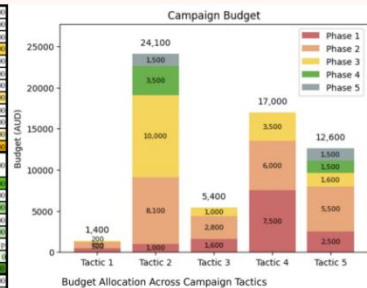

- Connects assets from Campus Tour, Open Day, Marathon and authorised UGC

**Innovation:** A sustained explainer series that builds familiarity through clearer, two-sided content (Smith, 2013).

## Budget

| Phase                                              | Campaign Budget                         | Cost (AUD)    |
|----------------------------------------------------|-----------------------------------------|---------------|
| 1. Campus Tour "See the Care Behind the Care"      | Phase 1: Pre-Campaign                   | 114           |
|                                                    | Phase 2: On-Site Activation             | 114           |
|                                                    | Phase 3: Post-Campaign                  | 114           |
|                                                    | Total Cost of Phase 1                   | 114           |
|                                                    | Total Cost of Phase 2                   | 114           |
|                                                    | Total Cost of Phase 3                   | 114           |
|                                                    | Total Cost of Phase 1                   | 114           |
|                                                    | Total Cost of Phase 2                   | 114           |
|                                                    | Total Cost of Phase 3                   | 114           |
|                                                    | Total Cost of Phase 1                   | 114           |
|                                                    | Total Cost of Phase 2                   | 114           |
| 2. Charity Marathon "See the Care Behind the Care" | Phase 1: Technology & Software          | 1,000         |
|                                                    | Phase 2: Creative & Digital Production  | 1,000         |
|                                                    | Phase 3: Media & Influencer Engagement  | 1,000         |
|                                                    | Phase 4: On-site Operations & Logistics | 1,000         |
|                                                    | Phase 5: Miscellaneous                  | 1,000         |
|                                                    | Total Cost of Phase 1                   | 1,000         |
|                                                    | Total Cost of Phase 2                   | 1,000         |
|                                                    | Total Cost of Phase 3                   | 1,000         |
|                                                    | Total Cost of Phase 4                   | 1,000         |
|                                                    | Total Cost of Phase 5                   | 1,000         |
| 3. Community Story Sharing UGC Challenge           | Phase 1: Campaign Preparation           | 1,000         |
|                                                    | Phase 2: Event Execution                | 1,000         |
|                                                    | Phase 3: Promotion & Contingency        | 1,000         |
|                                                    | Phase 4: Technology & Monitoring        | 1,000         |
|                                                    | Phase 5: Administration & Contingency   | 1,000         |
|                                                    | Total Cost of Phase 1                   | 1,000         |
|                                                    | Total Cost of Phase 2                   | 1,000         |

## Evaluation

1. Send the questionnaire again to the previous respondents, conduct another questionnaire, and compare the results with those from the previous one. To see if we finish our objective. For example: to compare the result of the new questionnaire that “somewhat familiar” or “very familiar” with RSPCA shelter operations to 65% within 3 months.

2. Track impressions, reach, shares, and UGC volume. Monitor hashtag usage and engagement rates.

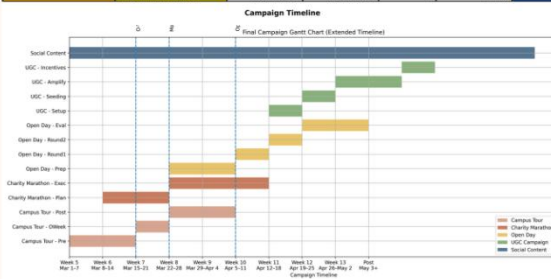

3. Behavioural Outcome Measurement:

To track offline registrations (150+ sign-ups), registration data analysis will be conducted. Count verified sign-ups from campaign channels and use QR codes or tracking links to attribute conversions.

## Timeline
